PROFESSIONAL DEVELOPMENT ACCOMPLISHMENTS AT TOUGALOO COLLEGE

I. TEACHING

1. ***List courses which you have taught during the past year (2017-2018*)**

Fall Course	Title	Credit Hours	Semester
Psy 213-1	**Abnormal Psychology**	**3**	**Fall 2017**
Psy 324-1	**Sensation & Perception**	**3**	**Fall 2017**
Psy 411-1	**History & Systems**	**3**	**Fall 2017**
Psy 423-2	**Senior Seminar I**	**1**	**Fall 2017**
Psy 425-1	**Internship in Psychology**	**3**	**Fall 2017**

Spring Course	Title	Credit Hours	Semester
Psy 216-1	**Experimental Psychology**	**3**	**Spring 2018**
Psy 222-1	**Adolescent Psychology**	**3**	**Spring 2018**
Psy 329-1	**Community Psychology**	**3**	**Spring 2018**
Psy 331-1	**Psychological Measurement**	**3**	**Spring 2018**
Psy 424-2	**Senior Seminar II**	**1**	**Spring 2018**

2. ***Describe any teaching/learning strategies which you plan to use, but have not used before*.**
My plans are to implement didactic, semester-long case and/or research assignments whereby student groups will work to actively use what they learn (e.g., from class discussion, readings, and other assignments) to address issues and questions raised by those assignments.

3. ***What outcomes have you implemented in terms of improvement in the quality of student learning and your teaching?***

Student learning has benefitted by the addition of an "applied" dimension to their course experiences. The use of semester-long case and/or research assignments has bolstered continuity in their studies and afforded students the opportunity to integrate what they have been learning into the whole experience of processing a case/research project from the beginning to its resolution.

I have made use of selected teaching strategies and methods developed by AVID (e.g., collaborative discussion groups, Cornell note taking, learning logs, and short writing assignments). In doing so, I have observed greater student enthusiasm and thirst for knowledge. In collaborating with each other in discussion/learning groups, their range of thinking processes expands and they must defend their analyses and conclusions by using evidence they actively put together. In collaborative learning, students are able to discuss and/or write after "pulling their thoughts together". They must also reflect on how their ideas relate to major course concepts.

I took the lead in developing, proposing, and implementing an approved (as of Spring 2012) Internship in Psychology course. At this time, the Department of Psychology has a good working relationship with one internship site and there will be additional sites added pending negotiations with other agencies in the Metro Jackson area to develop appropriate student placements.

4. ***List other activities in which you plan to engage in order to improve your teaching.***
The use of paraphrasing in-class exercises and take-home assignments has been implemented in order to improve students' research related writing skills. The didactic paraphrasing activities that have been used were similar to those developed by the Minnesota State Colleges and Universities Project Kaleidoscope. Please see the following website for more details:
http://serc.carleton.edu/sp/pkal/mnscu/activities/38476.html
I also make it a point to attend the AVID workshops that have been held at Tougaloo College.

II. SCHOLARLY AND / OR ARTISTIC ACTIVITIES
