

NOTICE

The Office of Career Services has established a partnership with OneWire, a revolutionary Career Management Tool that students and alumni can use to manage their careers for life. Top financial institutions rely on OneWire to conduct searches and assist in successfully finding high quality students from colleges and universities across the country.

OneWire allows candidates to build and maintain detailed professional profiles and be matched to hiring firms. OneWire also provides business tools, peer-to-peer networking, among other capabilities. Once a candidate has built a free profile, he or she has absolute control over which firms or individuals can view it.

OneWire is the ideal career management tool for all candidate populations:

- Undergraduate and graduate students seeking internships
- Seniors and graduating students looking for their first job after graduation
- Alumni, at all levels, seeking a new job or a career change
- Candidates interested in seeing what is available, networking, and making referrals

Remember, OneWire empowers candidates at all levels, enabling them to:

- Build detailed profiles for more precise career connections
- Filter opportunities based on their relevant experience and career goals
- Network with industry professionals
- Refer friends and colleagues and earn referral rewards
- Connect only with opportunities that precisely match their experiences and preferences
- Maintain complete control of their confidentiality
- Fill out one profile letting students be found by “member firms” resulting in more time spent on academic activities and less time on job application forms
- Level the playing field for students and alumni to be recruited by firms worldwide, including those that traditionally do not visit the campus
- Confidentially view all matched opportunities that meet

OneWire uses a two-step process to ensure that individuals are matched only with those opportunities that precisely meet their goals and experiences:

1. **Create Your Profile.** Visit www.OneWire.com to quickly and easily create your detailed profile.
2. **Get Matched.** OneWire uses the data in your profile to accurately match you with the right opportunities.
