This will be a year of hard work and monumental accomplishments. Together, we can make this the best year, the best school, the best faculty, the best staff, the best parents, the best community, the best district, and the best college experience ever!

MY EDUCATION TIMELINE

WHERE I WENT TO SCHOOL:

- Dr. Martin Luther King, Jr. Elementary
- Forest Heights Junior High School
- James Allen Fair High School

PROFESSIONAL EXPERIENCE:

- Upon graduating from Jackson State University, I began my teaching career as an English teacher at Whitten Middle School. After teaching four years, I received the opportunity to serve as assistant principal at Chastain Middle School. At the conclusion of my second year, I was invited to serve as the assistant principal for Curriculum and Instruction at Northwest Jackson International Baccalaureate World Middle School. During my third year in this position, I was promoted to principal. I served as principal of this school for six and half years wherein the last three years of my tenure, the school was ranked #1 in the State academically and #45 in the nation.

ABOUT ME

My educational philosophy is founded on the principle that education is a priceless asset which affords individuals access to opportunities for personal and collective success. I believe that as an educator, it is my duty to empower faculty, staff, students, parents, and community members to take ownership of the process for educating our citizens. This partnership will provide a support system for stakeholders which encourages self-discipline, requires accountability, models high expectations, and celebrates achievement. In addition to fostering increased academic success, I assert my belief that educators must use every available resource to produce self-confident, respectful, and caring future leaders who are poised to make entrepreneurial decisions and to improve the community in which we live.
