

Research and Internships:

- * TC-MC Research Symposium:
This annual event, sponsored by Tougaloo College and Mississippi College, provides a forum for students to make scholarly presentations of their senior research projects.
- * Individual Faculty Research Assistance:
Students may become actively involved in assisting faculty with their research.
- * Internship in Psychology:
This course affords students the opportunities to gain practical experiences through supervised observation and “hands on” activities in various fields and settings of applied psychology.

Department of Psychology Social Sciences Division Tougaloo College

Providing Opportunities for Intellectual and Professional Development

What is Psychology?

Psychology is the science of human and animal "BETs"... Behavior, Emotions, and Thinking. It is a broad discipline, where interests may range across biological, psychological, and socio-cultural domains.

Some Major Areas of Psychology

- Clinical Psychology
- Counseling Psychology
- Community Psychology
- Developmental Psychology
- Experimental Psychology
- General Psychology
- Health Psychology
- Industrial/Organizational Psychology
- Learning & Cognition
- Physiological/Neuropsychology
- Quantitative Psychology
- School/Educational Psychology
- Social/Personality Psychology

What Psychologists Do...

Psychologists provide services to help resolve a wide variety of problems and "put the pieces together" for individuals, families, groups, organizations, and communities. The clients or patients may vary in background, the nature of their problems, and the situations or settings in which psychologists work with them.

The Job Outlook

Opportunities for work in psychology are projected to expand, especially for those with advanced degrees. An undergraduate degree constitutes a solid preparation for graduate studies in psychology, or in other fields such as social work, medicine, nursing, allied health sciences, public health, education, business, law, criminal justice, human resources, or for work in any vocation needing "people skills" and knowledge are desirable.

Psychology graduates generally report being pleased with their studies, which helped prepare them for life and their careers.

Mission Statement

The objectives of our department for its students are the development of a scientific understanding of psychology, and a capacity to evaluate new developments critically in the field. Our well-rounded curriculum features core courses on the basics of psychology, and electives to provide students more advanced levels of understanding and research skills in a number of specialty areas. Our graduates are well equipped to pursue higher studies in psychology or other vocations. Our department also prepares students for a lifetime journey of conscientious learning, healthy caring, and thoughtful conduct.
